

APPLIED BEHAVIOR CENTER for Autism

Exceptional Therapy for Exceptional Children

Applied Behavior Center for Autism is seeking ambitious, energetic and motivated in-home and in-center behavior assistants and therapist substitutes to provide ABA therapy to children diagnosed with autism or a related developmental disability.

Applied Behavior Center (ABC) for Autism was founded to establish a child-guided, positive and effective therapeutic environment for children with autism, related developmental disabilities and learning challenges from ages 18 months to their 22nd birthday. Our program uses ABA (Applied Behavior Analysis) as the treatment methodology to help all of our clients reach their maximum level of independence and ability. By utilizing ABA we are able to address behavior excesses and behavior deficits. With thorough assessments and considerate observation we are able to assist all children regardless of age, level of disability, or diagnosis.

Job responsibilities include: (abbreviated list)

- Providing direct therapy to children with developmental disabilities
- Implement skill acquisition programs
- Implement behavior improvement protocols

Ideal candidates will be required to have the following characteristics:

- Energetic
- Patient
- Professional
- Creative
- Child – friendly

Training and compensation is provided.
